PERSONAL STATEMENT

Skilled Risk Management and Data Analytics professional with expertise in underwriting, financial analysis, and claims management. A First-Class graduate of Risk Management and Insurance from Lagos State University (First Class Honours, 4.65/5.00), combining a strong academic foundation in risk, underwriting, and financial analysis with hands-on data analytics experience. Excels at identifying risks, analysing financial and performance trends, and developing tailored risk mitigation and data-driven strategies. With a solid foundation in IT and operational risk, delivers data-driven solutions that enhance decision-making and ensure compliance with industry regulations. Currently working towards Associate membership of the Chartered Insurance Institute of Nigeria (ACIIN), and holds certifications as a Certified Data Scientist and Certified Data Analyst from Axia Africa. Highly analytical and results-oriented, and committed to minimising risk while driving profitability and business performance. Actively involved in insurance innovation, having contributed to the development of data-driven inclusive insurance solutions and reached the finals of a national Insurtech hackathon.

WORK HISTORY

January 2026 – Present • 7 months • Hybrid

Data Analyst Intern | Cube Cover

- Supported data-driven decision-making by setting up and managing website analytics and tracking tools to monitor digital performance.
- Analysed key performance metrics including website traffic, user engagement, and conversion rates to generate actionable insights.
- Prepared and delivered periodic performance reports to guide strategic improvements and optimise user experience.
- Used data analysis to identify trends, patterns, and opportunities for continuous website optimisation.
- Managed post-launch website operations including content updates, maintenance, and performance monitoring.
- Ensured website alignment with brand, business objectives, and compliance requirements while maintaining uptime, security, and functionality.
- Proactively recommended data-backed improvements to enhance website performance, engagement, and conversions.

2022 – Present • Part-Time

Risk Management Specialist / Data Analyst | Cybergenix Integrated Solution

Managed Service Provider offering IT services, support, and system integration for local and international businesses

- Spearheaded risk assessment processes for IT service delivery, identifying vulnerabilities in system integration projects and reducing service disruptions by 20%.
- Implemented a risk mitigation framework for local and international clients, improving cybersecurity measures and increasing client retention by 15%.
- Collaborated with cross-functional teams to assess operational and strategic risks in IT infrastructure, providing insights that improved decision-making and client satisfaction.
- Designed and conducted risk training programmes for internal teams, improving compliance with regulatory standards and IT security protocols.
- Supported business performance improvement through data collection, analysis, and visualisation, while monitoring emerging risks and advising management on proactive measures.

2015 – 2022

Mechanical Engineer (Petrol & Diesel Engines) / Adehas Engineering Ltd

- Acquired engineering skills in servicing, repairing, and maintaining a wide range of engine types, including Lister, Perkins, and other petrol and diesel engine brands.
- Progressed to lead engineer, spearheading installation, assembly, and coupling projects.
- Coordinated the sales and maintenance of a wide range of engines for multiple client businesses.
